SPER Chemical is a Small Business established in 1980 and have listed the following products on the GSA Federal Supply Schedule - **GSA Advantage!**

Blended Phosphates - All NSF Standard 60 Certified for Potable Use:

- Protect-All** Orthophosphate based liquid or granular formulation designed mainly for internal corrosion control & stabilization.
- Sequest-All** Long & Medium Chain Polyphosphate based liquid or granular formulation designed specifically for mineral sequestration and corrosion control. Sequest-All keeps water clear from discoloration from iron and manganese mineral precipitation throughout the water distribution system.
- Sequest-All EMC:** Pyrophosphate and Polyphosphate based liquid or granular formulation designed for controlling iron and manganese stabilization.
- Linear²:** Long Chain Based liquid or granular Polyphosphate designed with a high P₂O₅ ratio for long term sequestration and corrosion inhibition.

Certified to
ANSI/NSF 60

All of the Ingredients and Packaging Components of SPER Chemical's Potable Water Treatments Formulas are:

MADE IN USA

Packaging: The listed products are available in both liquid and granular forms in the packaging shown:
